Introduction

Welcome, Student, to the world of Alchemy!

In this book, you will find potions to induce love and desire, inspire truthful revelations, confuse the mind, and so much more. These tasty concoctions take the utmost care in preparation, for one wrong move or a solitary drop too many could cause serious adverse effects, and might taste rather awful! Take care to read the instructions thoroughly before you begin.

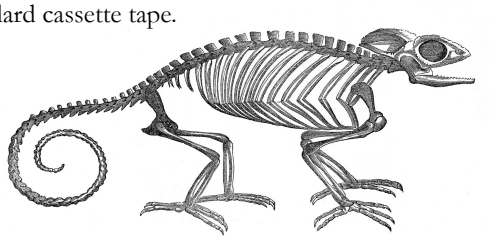
Each potion requires ingredients from the classroom's potion cabinets and additives that you'll find near the mixing stations..

Good luck and safe brewing!

Warning!

While your wands are of the highest possible quality, it's been noted that (while rare) they occasionally display wild magic around certain artifacts.

We will not be held responsible if your wand accidentally sparks off when brought near a finance card or Video Home Standard cassette tape.



Drinks can look alike.

Use a silly silicone marker to identify your beverage.

Instructions

This potion, when done correctly, will be a pale red color and will temporarily stave off lycanthropy.

1. Put the **Beaker** on the mixing station.
2. Place one Ice Crystal in the **Beaker**.
3. Touch your magic wand to your nose and then point it directly at the mixing station's keyhole while saying *Illuminus*.
4. Pour in the Chameleon's Blood and stir thrice.
5. Slowly drip Moondew into your potion with your left hand while stirring clockwise with your right.

915.—Dusky or Clouded Wolf.

6. Mix in the Basilisk Venom and whisper *Mutare* over the **Beaker**.

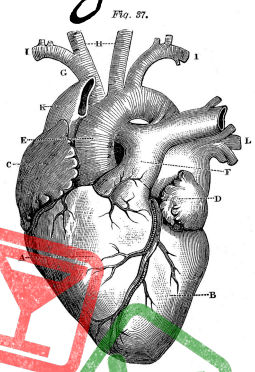
Siren's Song



Siren's Song is the strongest love potion ever concocted. Although it never will create real love (which is a powerful magic of its own), it can cause a powerful obsession. Sweet to taste, but consume with caution.

Ingredients

Dragon Spittle **—OR—** Specter's Spice
Demon's Dram **—OR—** Vampire's Thirst
Salamander Blood
Phoenix Heart (at mixing station)

Gather the first three ingredients from the potion cabinets and place in your carrier basket. Take them along with a **Beaker** to the mixing station to brew your potion.

Draught of Living Death

Ingredients

Goblin Sweat **—OR—** Troll Tonic

At mixing station find:

Dragon Claw Ooze
Viper's Sigh
Ent Finger

Sweat and Tonic are the most potent when used alone, with few alterations. Just a few drops of Dragon Claw Ooze is all that's necessary to brew this fatal brew, along with some Viper's Sigh to make it palatable and a sprig of Ent Finger.

Instructions

1. Place the **Beaker** on the mixing station.
2. Swirl your wand around the outside edge of the vial filled with a measure of Goblin Sweat three times.
3. Say *Mutatio Sudore*, then transfer to the **Beaker**.
4. Point your wand at the keyhole and say *Vertere.*

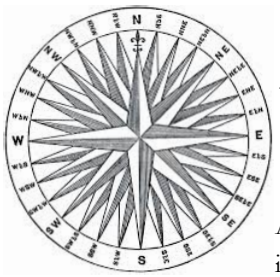
7. Add 6 drops of the Infusion of Wormwood to the potion carefully. Pause for a second between each drop.
8. Stir with a sprig of Jewelweed until the Iocane Powder forms a small hurricane in the **Beaker**.
9. Carefully drop a few Ice Crystal Shards, as a large splash could cause an explosion.
10. Point your wand to the keyhole and say *Nox.*



Kiss of the Fairy

Although the taste of this golden elixir is slightly sweet, it's nothing compared to its effects. A fairy's kiss can change your life.

Ingredients

Goblin Sweat
Gargoyle Wine

At mixing station find:
Infusion of Wormwood
Iocane Powder
Jewelweed

Gather the first two ingredients from the potion cabinets and place them in your carrier basket. Take them to a mixing station along with a **Beaker**.

Instructions

Take special care when brewing this potion.

1. Place the **Beaker** on the mixing station & add Goblin Sweat (or Troll Tonic).
2. Point your wand at the keyhole and say *Vertere*.
3. Add 4 drops of Dragon Claw Ooze, and allow them to disperse fully before moving to the next step.
4. Add 4 more drops of Dragon Claw Ooze, then immediately stir clockwise twice, anti-clockwise four times.

5. Top with Viper's Sigh, and add the Ent Finger so it's sticking upright from the **Beaker**.
6. Using your innate pyrokinesis ability (or using the provided fire-starting device), singe the Ent Finger. Singe it just a bit and blow it out.
7. Add an Ice Crystal Shard.
8. Point your wand to the keyhole and say *Nox*.

Confusing Concoction

If your goal be to boggle the mind, this potion will produce quick results. Powerful, yet succulently savory to the tongue.

Although this has few ingredients, it's deceptively potent—and quite tasty!

Ingredients

Dragon Spittle
Vial of Hemlock

At mixing station find:

Two Plimpy Eyes
Diminutive Wooden Stake

Gather the first two ingredients from the potion cabinet and put them in your carrier basket.

6. Impale the eyes on the Diminutive Wooden Stake, swirl them around the bottom of the potion 6x counterclockwise, followed by 3x clockwise.
7. Add the impaled Plimpy Eyes to the **Conical Chalice**, leaning the Diminutive Wooden Stake carefully along one side, its tip pointing due North.
8. Insert an Ice Crystal Shard.
9. Point your wand to the keyhole and say *Nøx*.
